SquareChute Trash System

Tired of trying to force square debris down a round Hole? Reduce jams and **work smarter with Garlock.**

SquareChute Technology: Reduce jams and remove debris faster with SquareChute. Durable square seamless design that is stackable and built to last with 3/16" thick construction. Integrated chains with tool-free connection make installation quick.

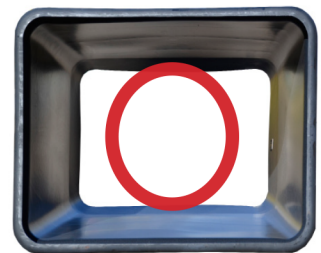

Improve Efficiency: Handle debris once by dumping directly into trash hopper. Wide outriggers provide drive up access for powered carts and larger carriers. No-tool installation reduces labor.

Versatility: Let your system grow with you. Choose either the standard system or the Pro-Series with swivel hopper. The pick box (standard on Pro-Series) provides easy installation and storage. Add SquareChutes as required. Optional chute storage rack simplifies transportation. A Winch system is also available to aid in chute installation.

Safer Operation: Keep workers safe with integrated header safety rail and chains. Hopper fences minimize debris loss.

One Piece molded for Durability

Red = round chute size

SQUARECHUTE SYSTEM: FEATURES AND OPTIONS

Large loading zone allows direct dumping into hopper. Integrated rails and hopper fences standard.

Pick Box keeps your system organized and simplifies installation.

Optional chute rack holds (6) chutes
